PREFACE

Dear Colleagues, Dear Friends,

Welcome to Peace Event Sarajevo 2014. In an age of conflicts and confrontations, 100 years after the start of World War I we want to appeal for a culture of peace and to stand up for peace, disarmament, civil conflict resolution and non-violence as well as social and ecological justice.

You are holding the Event Program in your hands. It is designed to give you an overview of all the activities with the relevant schedules, times and locations.

On the central plan and in relevant lists you will find the practical information you need:

- The opening and closing events - let us once again invite you all to attend!
- The five Round Tables on the core issues
 - A Culture of Peace and Nonviolence
 - Gender, Women and Peace
 - Militarism and Alternatives
 - Peace and Social Justice
 - Reconciliation and Dealing with the Past
- Almost 200 workshops (many thanks to everyone who is contributing to this impressive collection of interesting topics!)
- A wide range of cultural activities (and here, too, our heartfelt gratitude!)
- The Youth Camp with its own events

There is also additional information which you will hopefully find useful to make your stay in this beautiful old city even more enjoyable.

We have tried our best to compile everything we could think of which you might benefit from. However, there is undoubtedly still something missing, and the error gremlins will have left their mark, so please excuse this! And for any problems or difficulties that arise - let us find solutions together in a spirit of respect, solidarity and tolerance.

This large Peace Event has been organized from the grassroots with many hours of voluntary and selfless work – many, many thanks to everyone who has helped.

We would be grateful for any tips about what is missing and what should be added. We will make every effort to ensure ongoing communication with you via social media, in the Peace Cafe, and with old-fashioned Info Points and notices. You will find this information via the app and the Twitter account (see further information below).

Further information can also be found on the multilingual website: www.peaceeventsarajevo2014.eu

Please use this Event Program as a guide to help you find your way around Sarajevo and the wide range of events.

And please let us not forget that this city and this country have survived a merciless war, whose physical and psychological effects can still be felt today, and also a natural disaster, which destroyed large areas of the region.

We, too, will try to make a small solidary contribution to help the victims.

Our thanks go out to everyone who has actively helped so far. However, it is up to us all to determine the final results of the great Peace Event Sarajevo 2014. So please follow this invitation to have fun and interesting discussions, gain plenty of new insights, and hopefully make new friends.

PEACE EVENT SARAJEVO – STATEMENT

You will meet several thousands of people committed to peace mainly from Europe and the region of Western Balkans, speaking out together against war and violence 100 years after the beginning of World War I.

People all over the world want to live in peace – but the last century has seen wars and violence at all levels and in most parts of the world, including the former Yugoslavia. We believe and want to show that the power of active nonviolence is the only sustainable way to transform a world of wars and violence into a culture of peace and nonviolence. Current events in Ukraine, Syria, Central Africa, and many other parts of the world, as well as the wars in Yugoslavia in the 1990s and the current social protests in Bosnia and Herzegovina, require our joint commitment and public statement that there are alternatives to war in the form of civil, nonviolent conflict transformation, as shown in many successful non-violent campaigns as well as in official documents like the UNESCO declaration on a “Culture of Peace”. Our common goal remains the vision of Bertha von Suttner, Mahatma Gandhi, Albert Einstein, Martin Luther King, Nelson Mandela, and many more, namely: a world without war and violence. The more of us who participate and demonstrate this clearly at the Peace Event in Sarajevo, the stronger our signal for “another world possible” will be!

An international Forum

In Sarajevo there will be more than 100 workshops and round tables organized around five thematic issues: **a culture of peace and nonviolence, gender, women and peace, peace and social justice, reconciliation and dealing with the past and militarism and alternatives.** These workshops, offered by a big variety of local, regional, European and international organizations, will contribute to show the diversity of existing peace work and support a critical analysis and the drawing up of new alternatives. The importance of „dealing with the past and reconciliation” in the Western

Balkans and other war-torn societies, as well as lessons to be learned from the history of wars and violence 100 years after World War I, will be highlighted in discussions.

A Cultural event

We will also be present on the squares and streets of Sarajevo with cultural contributions. The Peace Event should be marked by a culture of peace represented in all its facets and made accessible to everyone. Peace is something that should be celebrated.

Join the Youth Camp of dialogue and cultural exchange!

From June 6 to 10, 2014, Sarajevo will also be a major meeting point of young people to stand up against war and for a peaceful, just and sustainable future. In our large-scale Sarajevo Youth Camp we will discuss our commitment against war, develop alternatives and present these to the public. This gathering will be a contribution to strength the Youth Peace movement in Europe. All of you are invited to come, participate and create.

Peace from the bottom

The Peace Event Sarajevo 2014 is currently being prepared by an international, a national and a local coordinating committee. More than 100 groups from Bosnia and Herzegovina, cooperating in the Network for Building Peace / Mreža za izgradnju mira, are co-organizing the event. Peace activists from all former Yugoslavian countries are actively participating as well. The event happening in Sarajevo from June 6 to 9 is a symbol of peace, reconciliation and understanding as an alternative to war – an example of the “common house of Europe” seen from a grass-roots perspective. During these four days, we want to try to actively “live” peace.

We hope that you will come and join us, and we are looking forward to meet you in Sarajevo.

Letter to the victims of floodings

Dear ladies and gentlemen,

It is with great concern and consternation that we have learned about the numerous victims and tremendous destructions due to the floodings in the Balkans and especially in Bosnia-Herzegovina, Croatia and Serbia.

We would like to express our deepest sympathy and sincere support to those, who suffer from the consequences of these worst floodings in over a century in the region.

Preparing the Peace Event, which will take place in Sarajevo from 6 to 9 of June, we turn to all organizations, initiatives and partners supporting this international Event: Please help with both monetary and material donations! The long-suffering people in Bosnia-Herzegovina need our support and assistance.

This short letter is an expression of our deepest solidarity with the citizens of Bosnia and Herzegovina and a small token of sympathy and compassion.

Sincerely yours,

The International Coordinating Committee of the Peace Event Sarajevo 2014

ROUNDTABLES – BKC, JUNE 6-9

GWP – Gender, Women and Peace A controversial debate about the UN Resolution 1325

BKC, Friday, June 6, 2-5 pm

Women around the world have celebrated UN Security Council Resolution 1325 of 2000 on Women, Peace and Security, welcoming it as a tool for peace, democracy and the prevention of war. In the years since its adoption the world has witnessed a massive increase in military spending, and more illegal and disastrous wars, with the 'protection' of women sometimes used as a pretext. Although European countries have implemented the UN 1325 resolution, the presence and participation of women in decision making structures are not increasing and in post conflict situations women are more victims than active part of building peace. We see NATO citing Resolution 1325 while, instead of peace-keeping, it fosters militarization, expands its machinery worldwide, and fights aggressive wars.

In the Round Table we want to discuss our demand for a peaceful, gender-just, non-violent society, in which women are visible in the public and integrated in decision making and societal responsibilities, a society with respect and dignity for all human beings independent of their religion, tradition, colors and origin.

Speakers: Ingeborg Breines (Norway, Co-President IPB), Dragana Dardic (BiH, Helsinki Citizens' Assembly Banja Luka), Katharina Kruhonja (Croatia, Right Livelihood Laureate), Jadranka Milicevic (BIH, Foundation CURE and CARE International, Sarajevo), Sissy Vovou (Greece, Activist)

Moderation: Kristine Karch (Germany, Int'l Network No to War - No to NATO)

MA – Militarism and Alternatives

BKC, Saturday, June 7, 10 am-1 pm

The crisis in and around Ukraine shows the consequences of a politics of militarization for peace and international security, and for a Europe which is at long last a peaceful common home. In this workshop we want to discuss the alternatives to confrontation – from all sides.

Global military expenditure is around \$1.7 billion, NATO is the strongest military alliance in history, and the world is full of wars and armed conflicts. Still today, all life on earth could be ended by the use of nuclear weapons. The EU has developed new military structures and becomes more and more like one leg of the NATO structure. New conflicts like those in East Asia dominate international politics while old ones like Middle East remain unsolved.

Given this context, we have to face the fundamental question: what are the alternatives to militarization? We propose a broad discussion on peaceful conflict prevention and resolution, cultures of peace, disarmament, the OSCE and UN structures and many new ideas for setting the world on a peaceful path.

Speakers: Jeremy Corbyn (GB, Member of Parliament), Joseph Gerson (USA, American Friends Service Committee), Ljulletta Goranci Brkic (Bosnia and Herzegovina, Nansen Center), Mairead Maguire (Ireland, Nobel Peace Laureate). We have also invited Members of the European Parliament.

Moderator: Reiner Braun (Germany, Co-President International Peace Bureau)

CPN – A Culture of Peace and Nonviolence

BKC, Saturday, June 7, 6-9 pm

Inspired by Gandhi and built through a lot of experiences, the Culture of Peace and Non-

Violence remains a challenging concept for our world.

Peace is more than the absence of war, it is living together with our differences – of sex, origin, language, religion or culture – while developing equality of rights, equal respect for each person, participative democracy and universal respect for justice and human rights on which such coexistence depends. Therefore, peace is never achieved. It is an on-going process. Nonviolence is the way towards this long-term goal. Rejecting violence in all its different forms, it requires awareness and active participation by all individuals and communities. It is an everyday life decision.

The participants in the Round Table will highlight this comprehensive approach to a Culture of Peace and Nonviolence in its different dimensions, but also add their personal experiences of nonviolent activism from their specific contexts.

Speakers: Adolfo Pérez Esquivel (Argentina, SERPAJ, Nobel Peace Prize 1980), Victoria Barrès (France, Association Montessori Internationale / International Network for a Culture of Peace and Non-violence), Ibrahim Al-Assil (Syria, Syrian Nonviolence Movement), Goran Božičević (Croatia/Macedonia, Miramida Centar), Zorica Trifunović (Serbia, Women in Black)

Moderation: Christian Renoux (France, International Network for a Culture of Peace and Non-violence), Pete Hämmerle (Austria, International Fellowship of Reconciliation)

PSJ – Peace and Social Justice

BKC, Sunday, June 8, 10 am-1 pm

In the world today basic needs are satisfied, public services are collapsing jobs are threatened or destroyed, large fraction of the population is marginalized, inequality of income and welfare increase.

These situations create tensions and conflicts, divisions between groups, races, nations. If social insecurity and fear is spreading there are

risks of violent conflicts, and even war... at the expense of human security: economic security, food security, health security, environmental security, personal security, community security, political security.

In the world today, one can witness the growth of social uprising and movements of resistance in a lot of countries. They are defending the living standards, demanding democracy and social justice, fighting corruption and inequalities, struggling for the peaceful reconstruction and development of society.

The roundtable will come back to the principles of human security, and study social movements, in particular in the Western Balkans

Speakers: Mary Kaldor (UK, London school of economics), Milenko Sreckovic (Serbia, Pokretzaslobodu), Goran Lukic (Slovenia, Association of Free Trade Unions), Ines Tanovic (BiH, Sarajevo Plenum), Igor Stiks (Croatia, Balkan Social Forum)

Moderation: Zoran Ivancic (BiH, Fondacija CPI Public Interest Advocacy Center), Bernard Dreano (France, Assemblée européenne des citoyens HCA-France)

RDP – Reconciliation and dealing with the past - Is silence the price to pay for peace?

BKC, Sunday, June 8, 2-5 pm

There are many different ways for a society to deal with its violent past. And there are many different ways to build peace and (re)construct broken ties within a society after a violent conflict. Current “transitional justice”-concepts emphasize the importance of openly facing the past for the rebuilding of a society which has gone through a violent conflict. In the same time, many individuals and societies prefer to avoid addressing the violent past because they estimate that this is a too sensitive issue and that silence is the price to pay for a pragmatic living together. Under which conditions can “dealing with the past” and “reconciliation” become complementary processes, and under

which conditions are they obstructing each other? How much memory and how much forgetting do we need in the (re)construction of societies which went through a violent conflict? Discussing examples from different countries, this round table will bring together practitioners in the field of dealing with the past from South Eastern Europe and other regions from Europe and the world.

Speakers: Christine Hoffmann (Germany, Pax Christi Berlin), Aleksandra Letić (BiH, Helsinki Committee for Human Rights in Republika Srpska), Véronique Nahoum-Grappe (France, Ecole des Hautes Etudes en Sciences Sociales), Vesna Terselić (Croatia, Documenta)

Moderation: Nicolas Moll (Bosnia and Herzegovina, Memory Lab Sarajevo)

PEACE ASSEMBLY – BKC, JUNE 9, 10-12 AM

Monday June 9, on the final day of the Peace Event, it will be time for the future with the Assembly of Convergence for Peace. The organizations, networks, movements, individuals, who have been thinking and working together during the Forum's round tables and workshops and the Youth Camp can gather to jointly evaluate which common action or work they may propose or strengthen in order to build this other world of peace and justice we want.

In case there is a demand, this Assembly of Peace can be organized with several "meetings of convergence for action" before joining together. In such "meetings of convergence", participants can join together to see how to carry on discussion on specific topics and themes as a result or an outcome of the activities during the Peace event, and/or to build international actions and campaigns. All kinds of action can be considered as working base for these convergences - something that should facilitate the articulation between different networks and movements.

The Peace Event does not deliberate as a body. There will be no final declaration or statement on behalf of all the participants. No-one, therefore, is authorized, to express positions claiming to be those of all its participants. Nonetheless, participants, organizations or groups of organizations that participate in the Peace event can deliberate on declarations or actions they may decide on, whether singly or in coordination with other participants. The Peace Event will circulate such decisions without directing, hierarchizing, censoring or restricting them, but as deliberations of the organizations or groups of organizations that made the decisions.

The participants who want to propose ideas, initiatives, actions, campaigns to be discussed at the Assembly of Convergence for Peace, or to propose a thematic Meeting of Convergence can do it during the first 3 days of the Peace Event.

International Conference in Sarajevo The place of women in war 1914- 2014

June 7th and 8th 2014 Bosanski Kulturni Centar (BKC) Sarajevo

The Women in War inaugural conference will take place in Sarajevo on June 7th and 8th, with the support of the University of Sarajevo's Gender department and the Sarajevo Peace Event.

2014 marks the centennial of the start of World War One and a greater visibility of women in armed conflicts. Along with the numerous commemorative events and conferences that will be taking place, this centennial is a unique opportunity to assess the experience and consequences of war on women twenty years after the war in the ex-Yugoslav area (1991-1995), with a look into the past as well as at conflicts of the same period, namely Rwanda.

Third part of three part projects.		

Japanese Prime Minister Abe just publicized his plan to change the interpretation of war-renouncing Article 9 to allow the use of force overseas. If formally endorsed, the move would not only make Article 9 a dead letter, but also jeopardize the fragile peace in Northeast Asia, further escalating military tensions between Japan and China.

Article 9 acts as an international peace mechanism towards disarmament, demilitarization and a culture of peace.

Japan's peace movement needs your urgent support - for Japan's peace constitution and against Japan's rising militarism.

PSJ	Mexico: Conflict, Security and Peacebuilding	56
YCG-1	UNIVERSIDAD IBEROAMERICANA, AC./International studies department	Mexico
<p>Mexico is not at peace. The Global Peace Index places our country at the 133th position out of 163 studied countries, a condition which has deeply deteriorated in the course of the past 7 years. The conflict that Mexico is experiencing is the product of decades of structural violence and structural peacelessness. We propose to discuss the Mexican case as a laboratory in which several roots of conflict (inequality, lack of institutions efficiency and corruption, drug trafficking, social cohesion) can be studied.</p>

MNS-2	Information Centre on Militarization (IMI), German Drone Campaign, Code Pink	Germany
In WWI new weapons transformed the role of distance on the battlefield. Poison gas, then called "a higher form of killing," was later internationally banned. Today drones expand the surveillance-field - and thus the battlefield - across the entire world, impacting us all. Whole populations are "disciplined and punished"; individuals deemed "abnormal" may be eliminated. Join us to organize the first International Action Day Against the Use of Drones for Killing and Surveillance October 4, 2014.

GWP	Women in Resistance Against Militarization, Criminalization and Violence	188
BKC-D1	The World March of Women	International
Today we are witnessing that capitalist patriarchy undergoes a main restructuring to sustain the current order of oppression and exploitation. This requires and magnifies the same violent mechanisms of primitive accumulation in the origin of capitalism: appropriation of nature, appropriation of people's rights and their means of subsistence, control over women's bodies and lives. Militarism, criminalization and violence are the means used to control over women's bodies and labor, nature and colonies.

How could international and national governance mechanisms and regulatory regimes be developed for assuring that activities in BSL3-4 laboratories are focused on peaceful purposes? The USA have built new central reference laboratories at Almaty and in Tbilisi. Do activities in these laboratories represent a beginning of cold war?</p>		
RDP	Intensive Dialogue After and Across Genocide - the Example of Austria and the Holocaust	83

RDP	Respect for diversity and non violent conflict resolution in early years	108
HM-1	Pomocdeci	Serbia
General attitude that young children do not notice differences, show no prejudice and do not have discriminatory behavior is challenged by the research that shows that children as young as three years of age notice differences very well and that at the age of six, one in six children has negative, discriminatory comments about those who do not belong to the child's community in the segregated societies. Therefore, the right moment to start learning to respect diversity is in the early childhood.

RDP	The role of collective traumata for the collective identity and the possibility for the political abuse of these traumatizations by demagogic leaders	67
HM-3	Member of the IPPNW (Int. Physicians for the prevention of Nuclear War/Doctors in Social)	Germany
The main contribution of collective identity are collective traumata, which can be, also after long periods of "sleeping", activated in certain political situations especially by the manipulative abuse by demagogic leaders. These leaders refer to collective trauma, where the group in its history has become a victim of another group, thus inducing severe anxiousness to once more become a victim and by this mobilizing the will to defend the group, i.e. to be ready to go to war.

And is a new cold war or even a "hot war" a real risk in 21st century Europe? What is the role and the future of the European Union? “The Unsustainable Art of War”, A semi-tragic ibit around the Great War by Alfredo Lacosegliaz		Kino
Sat 12pm-1:30pm	Associazione culturale ALPE	Italy
<p>This performance is one way of elaborating memories. A multimedia kaleidoscope of history where historical documents alternate with animations of propaganda cards, coin carousels, a variety of objects on display and testimonials. A juxtaposition which illustrates how the feelings and impulses of the opponents are a mirror image. The common denominators are religion, the love of one's country and the same sufferings and injustices endured. A funfair of history which, with bold intellectual recklessness and contemporary respectful levity, not only invites us to not forget, but suggests the simplest of questions: How could all this happen?</p>

YOUTH CAMP & ACTIVITIES

Meet young people from the Balkans, Europe and all over the world!

The Youth Camp is a place where young activists and advocates for peace from the Balkans, Europe and all over the world come together, in order to meet likeminded people, to learn from each other and to build understanding, friendship and social networks. The principles of the camp are nonviolence, a culture of peace and human dignity, as well as values such as pluralism, democracy, nondiscrimination, tolerance, justice, solidarity and gender equality.

Youth camp participants are invited to take part in all the activities of the main event and there will be specific self organized youth camp activities, like diverse seminars, workshops, creative and cultural activities and sports! There will be a special emphasis on intercultural understanding and dialogue, reconciliation and dealing with the past, and peace and nonviolence education. Different approaches — with a focus on bringing together people from different countries — ranging from peer-to-peer education to nonviolent training, reconciliation seminars and expert dialogues are being pursued.

The Youth Camp with youth activities will take place from June 6-10 at Camp Oaza in Ildza. The youth activities address the participants of the youth camp, but any participant of the Peace Event is welcome to join in.

Disarmament for Development		Spa1

<p>In 2011 global military spending amounted to \$1730 billion – despite the fact that 1 billion people suffer from hunger, even more do not have access to safe water or adequate health care and education, and even in the developed world millions are without work. The Millennium Development Goals cannot be realized while the world squanders its wealth on militarism. However, apparently unlimited financial resources seem to be available for military jets, tanks, ships, bombs, missiles, landmines and nuclear weapons. How to reverse this process is the challenge of today.</p>
